

Ärztliche Verrechnungsstelle Büdingen

PITSS.CON Customer Success for Oracle FORMS

Using PITSS.CON, the Ärztliche Verrechnungsstelle Büdingen can check the completeness of the Forms application within a few days

"PITSS has convinced us with its integrated concept for optimum life cycle management of our complex Forms application. We feel that PITSS.CON is the only solution that meets our requirements for completeness checking, migration and further development of the Forms application."

Helmut Glas, EDP & Support Manager, Ärztliche Verrechnungsstelle Büdingen

Customer profile

The Ärztliche Verrechnungsstelle Büdingen (PVS Büdingen) has been one of the biggest service providers in the field of private medical invoicing for over 80 years. It offers clinicians solutions for professional invoicing and successful debt management. The PVS Büdingen's main role is to relieve clinicians of all non-medical,

commercial and administrative tasks. In association with its subsidiaries, the PVS Büdingen delivers an all-round service for doctors' surgeries and clinics. As well as its main site in Büdingen, there are other offices in Gießen, Kassel, Mainz, Nürnberg, Weimar and Würzburg.

Project

Completeness check and migration of a complex Forms application with PITSS.CON

Photo: PVS Büdingen

Initial Position

The PVS Büdingen's primary task is to ascertain the completeness of a complex software environment. This application was initially developed out of house, then further developed as a collaboration and in the meantime purchased under Oracle Forms 6cs. The PVS Büdingen intends to administrate its acquired Forms application itself, and to develop it further in the future.

Challenge

The PVS Büdingen wants to adopt a purchased extensive Forms application without getting involved in the detail of the complex dependencies of programs and objects. To this end, the application code will be checked for completeness in a first stage so that in a second stage it can be efficiently developed and migrated from 6i CS to 10g WEB. At the focus of this endeavour is a comparison of existing executable parts of the program with already-supplied source code. To do this, all program modules of the application such as e.g. Forms programs must be identified and their dependencies must be analysed and mapped.

Solution

The extensive and superb analysis/search functions of PITSS.CON mean that the PVS Büdingen can check the completeness of the supplied software in its entirety within the shortest possible time period. PITSS.CON supports the parsing, analysis and comparison of all sources of an application based on Oracle Forms. By loading all available source files into the PITSS.CON repository, after successful parsing, PITSS.CON can carry out a dependability examination that allows the employment of program modules to be ascertained. In this way, the PVS Büdingen have brought transparency to an unknown application and have gained the necessary confidence in the adopted software. In addition, the PITSS.CON revision control function is also of great benefit. This allows the Forms application to be developed by a number of staff members.

Projekt data

- Version of Forms: 6cs**
- No. of Forms: 200**
- No. of Forms users: 224**
- Project Term: 13 days**
- OS: Unix / SunSolaris**
- Datavbase: Oracle 9i**

Objective

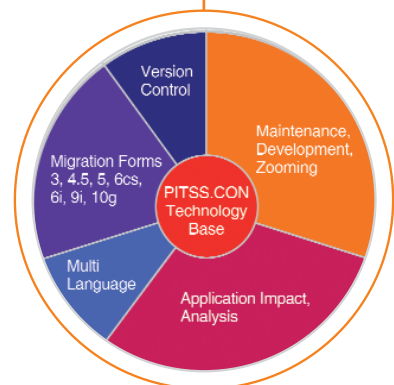

Adoption and incorporation into the application source code with 200 Forms programs and hence the fastest possible assimilation of efficient further development..

Result

Transparency and confidence in the adopted application.

Project schedule

- ✓ Transfer of the application to PITSS for tests
- ✓ 3-day PITSS migration workshop
- ✓ 10-day function test of the migrated application, consulting and adaptation
- ✓ Commissioning

PITSS GmbH

PITSS GmbH is the leading supplier of complete IT solutions for effectively managing Oracle FORMS applications. PITSS is an Oracle Certified Advantage Partner and works on projects in Europe, USA and Asia.

PITSS.CON

The innovative PITSS.CON software supports companies to quickly and cost-effectively analyse, migrate, develop and maintain Oracle FORMS applications.
